EDUCATION

University of San Francisco, BS Data Science, UX/UI minor *Anticipated graduation: 05/28*
Relevant coursework: Design for the Web, UX Research, R Programming

SKILLS

Design and prototyping: Figma, Adobe Illustrator, Photoshop, InDesign, Canva
UX research: usability testing, think-aloud sessions, heuristic evaluation (Nielsen), affinity mapping, field observation
Web and code: HTML, CSS, R (RStudio, Shiny), Python, Java

PROJECTS

- **myUSF usability study, UX Research course:** ran moderated think-aloud sessions (20–25 min) with 4 USF students; used affinity notes to surface issues in course search, unclear terminology ("attribute," "null"), and an alarming red-heavy degree evaluation.
- **Heuristic evaluation, Amazon Fire Stick setup:** observed a first-time user, then applied Nielsen's heuristics to two Wi-Fi failures; showed that a false "connected" status was the more serious problem because it compounded the second.
- **USFMobile app review:** compared USF's campus app with others using product documentation and App Store reviews; found repeated logins despite "remember credentials," related tasks split across pages, and a crowded mobile homepage.
- **Web design projects** (HTML, CSS): designed and coded a public portfolio site and a multi-page "thefeed" site documenting 12+ screenshots, recordings, and photos of daily digital life.

EXPERIENCE

Student Assistant, International Student & Scholar Services, USF *Aug 2026–Present*

- Grew ISSS Instagram engagement from 2K to 26K by designing event graphics, reels, flyers, and workshop video edits in Canva and Adobe, tailoring each piece's visual style to the event and its audience; also manage website content.

Academic Trainee, Government & Public Services (Industry & Infrastructure Advisory), KPMG India, Gurugram *Jun–Aug 2026*

- Designed and built the user interface of STARS, an R Shiny analytics platform now used by KPMG India staff on a government transportation-department engagement: filters by bus, route, stop, trip, and date, click-to-detail charts, and downloadable Excel reports, so staff move from raw upload to city-level report without spreadsheet hand-offs.
- Designed the data-intake experience: auto-mapped columns (100+ name variants), remembered file layouts, and 11 data-quality checks let users load files in any format without cleaning them first.
- Presented the finished platform to the staff who use it, walking them through the interface, data intake, and reports.

Academic Trainee, Digital Government Advisory, KPMG India, Gurugram *Jun–Aug 2025*

- Created process flowcharts and UX screens in Figma and Canva for an Ease of Doing Business analysis of municipal building-permit services (OBPAS).
- Supported research and client-facing deliverables for the Government & Public Services team.

International Community Intern, Cultural Centre, USF *Dec 2024–May 2025*

- Planned and hosted community-building programs for international students and created original Instagram content that extended event reach.

LEADERSHIP

- Outreach Coordinator, Indian Student Organization (10/24–Present) | Events Co-chair, International Student Association (07/25–05/26)
- Vice President, Data Science Association (10/24–07/25) | E-Board Member, Design Collectives (01/25–08/25) | Volunteer, GeoAI GeoEducation Summit (09/24)
